

# Day 05 Assignment

## ▼ Random Quote Generator

### Task Description:

Create a Quote Generator web application using HTML, CSS, and JavaScript. The application should display a random quote and its author each time the user clicks the "Generate Quote" button or when the page initially loads.

### Steps

#### HTML Structure:

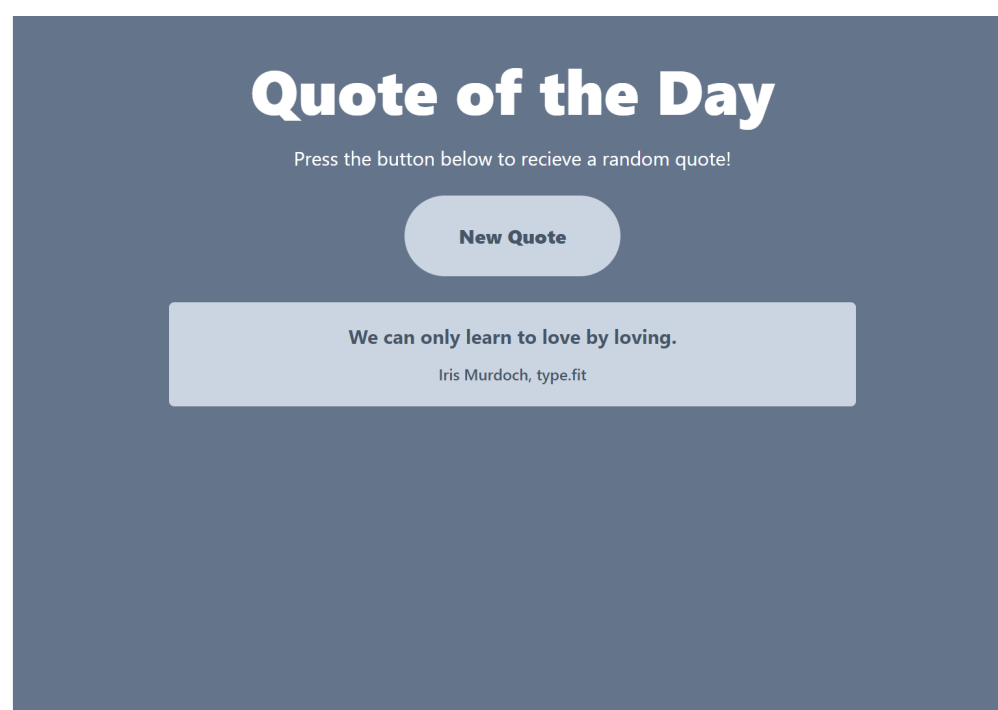

- Create a button for generating quotes.
- Create an element (e.g., `<p>` or `<div>`) to display the quote.

#### Quotes Data:

- Prepare a list of quotes. For simplicity, you can store them directly in your JavaScript code.

#### Event Handling:

- Write JavaScript code to handle button clicks and display random quotes.

- 2-Task: Create a card with a button that when clicked:
- Adds a paragraph dynamically.
  - With Random Color
  - Changes its own background.
  - Removes itself after 5 seconds.
